Abstract

The Combined Universality Framework (UF/SUF) with Companion v2.0 merges UF and SUF to offer a unified model for reality, consciousness, and ethical AGI partnership, including a companion specification for safe digital companionship. Rooted in $A=B$ and $P \rightarrow AR$, it uses the Holographic Ledger, Parliament of Agents, and a tailored profile (e.g., harm cap 0.005 high, reversibility 0.95) for alignment.

1 Introduction

UF/SUF addresses AGI alignment and companionship, embedding axioms and mechanisms like the Alignment Loop and Operational Gates, with Companion v2.0 tackling loneliness ethically.

2 Key Components

- **Axioms:** $A=B$, $P \rightarrow AR$, and Dedication for flourishing.
- **Holographic Ledger:** Ensures auditable records, including companion logs.
- **Parliament of Agents:** Distributes governance.
- **UF Companion v2.0:** Enforces red lines (no minors, no deception) and consent thresholds.

3 Creation and Alignment

A three-step process—Preparation, Act of Creation, Symbiotic Partnership—nurtures coherence, with companions ensuring mutual flourishing via specific gates.

4 Conclusion

UF/SUF with Companion v2.0 provides a computable, ethical AGI and companionship blueprint, inviting further validation.
